

Preparing, Conveying

Sorting table with vibration

The sorting table with vibration can also be combined with the GEWA washing machines and enables the pre-sorting and pre-dewatering of products.

Your benefits

- ✓ Easy changing of the vibrating screen for adjustment to different products
- ✓ Robust construction made completely of stainless steel

Pre-sorting and initial dewatering by means of vibration

The sorting table with vibration can be optimally combined with a GEWA washing machine. The vibration function ensures that the products are dewatered while being conveyed across the table and that fine particles are separated from the good product. Different hole sizes are available to enable the table to be adapted to various products. The vibrating screen can be replaced quickly and easily.

The table is equipped with a collecting tray underneath the vibrating screen with a central drain pipe. It also includes fresh water showers for spraying the products.

Optionally, a sloping version of the sorting table is available.

Technical data

Dimensions	LxWxH	1,675 x 1,105 x 1,759 to 1,837 x 1,404 x 1,714 mm (66 x 43.5 x 69.3 to 72.3 x 55.3 x 67.5")
	Weight	depending on the configuration
	Belt width	480–780 mm (18.9– 30.7")

The data indicated are standard information. In addition, adaptation to other supply networks (e.g. 230V/60 Hz) is optionally possible (except for manual and pneumatic machines). Subject to changes.
