

E TRANSLICER® CUTTER

SPECIALIZING IN ELONGATED PRODUCTS

The "E Translicer® Cutter (METRS) accepts firm products up to 4" (101.6 mm) in diameter and leafy-type, compressible products up to 6" (152.4 mm) in diameter. Optional static hold-down, non-powered top belt, or powered top-belt hold-down assemblies are available to maintain positive feeding assistance.

Interchangeable stainless steel cutting options include slicing, patented "MicroSlice", and julienne wheels. The number, placement, degree of pitch, and type of knives coordinate with the cutting wheel and feed belt speed to determine the size of cut. Combination wheels made-up of slicing and julienne knives are used to produce shreds.
