APPLICATIONS
The Comitrol Processor Model 1700 accommodates all three types of reduction heads which enables a broad spectrum of product processing capabilities. It is recommended for free-flowing dry and semi-dry product applications including textured vegetable protein, peanut butter, chicken slurries, surimi, baby food, dehydrated potato flakes, fruit and vegetable pastes, horseradish and dressings, extruded products, biscuits and cookies, nuts, fruit pulp, various spices, corn masa, hard cheeses, and a variety of gels, ointments, and creams.

This precision cutting principle has proven to be a processing breakthrough, with the versatility to meet your size reduction needs from coin size particles to fine emulsions. Standard operations include comminuting, granulating, milling, flaking, slicing, liquefying, dispersing, and pureeing.

Sealed enclosure deters escape of dust, vapor, and liquid when the Comitrol Processor is installed in conjunction with a collection system. Stainless steel construction ensures maximum durability and sanitation. The machine features continuous operation for uninterrupted production, and is designed for easy cleanup and maintenance.

TYPES OF CUTS
Particle sizes ranging from coarse to fine emulsions are possible. To ensure the proper combination of cutting parts, Urschel Laboratories, Inc. recommends your product be tested in one of our worldwide Product Test Facilities free-of-charge to find the most efficient solution to your size reduction needs.

If your product application is not mentioned on this page, contact your local Urschel representative to determine the most effective solution to your size reduction needs.
