

MODEL CC SERIES

INCREASED CUTTING OPTIONS

Urschel offers a variety of grating heads that produce cuts from coarse granules to different types of shreds. This increases cutting versatility for the Urschel Models CC, CC-D, CC-DL, and CCX-D.

Grating heads are made up of four posts with corresponding fasteners, upper support ring, locking lower support ring, and a grating screen. A multitude of interchangeable grating screens are available to easily switch from one type of grating style to another.

A test cut of your product is recommended to determine the optimal set-up for your application. For more information, contact your local Urschel representative.
