The capable TranSlicer<sup>®</sup> 2510 Cutter is ideally suited for leafy vegetables, popular applications include: romaine, iceberg, kale, radicchio, cabbage, spinach, celery, cucumbers, eggplant, honeydew, cantaloupe, and leek.

Several different interchangeable 25" (635 mm) diameter cutting wheels (slicing, crinkle slicing, shredding, and julienne) produce a full range of slices, shreds, and julienne cuts. An optional static hold down assembly is available for feeding assistance.

The TranSlicer 2510 accepts firm products up to 6-3/4" (171 mm) in diameter and leafy-type products up to 8" (203 mm) in diameter.

To accommodate different types of products, the machine offers a choice between three feed belt configurations: primary and secondary belts, full length primary belts, or the compact machine version featuring a shorter, primary belt. The machine operates via a variable frequency drive (VFD). The feed zone is completely separate from the mechanical zone to promote sanitation.
