

Quality Pet Food Begins with Quality Cuts

Palatable, quality pet food begins with choosing just the right ingredients. Keeping this special palatability depends upon careful processing to ensure the best-tasting and highest quality product. That's why pet food processors continue to rely on Urschel cutting equipment for their processing solutions.

- Urschel machines offer easy cleanup and low maintenance.
- Quality constructed machinery built for continuous operation for less downtime and increased productivity.
- Urschel gives you a full line of cutting equipment including: shredders, granulators, slicers, dicers, emulsifiers, and more.
- Complete product test cutting facilities worldwide to assist you in determining which is the best Urschel machine for your specific application.
