EXPLORE BIAS SLICING SOLUTIONS TO MEET YOUR PROCESSING GOALS

Bias slice thickness and product (left to right): 3/16" (4.8 mm) Carrot, 1" (25.4 mm) Celery, .060" (1.5 mm) Pepperoni, 3/16" (4.8 mm) Leek, 1" (25.4 mm) Green Bean, 3/16" (4.8 mm) Crinkle Pickle, 3/16" (4.8 mm) Pickle, & 3/16" (4.8 mm) Jalapeño

Urschel's reputation as the global leader in food cutting technology is universally recognized. We work with large and not-so-large processors to assist in **capturing profitable, niche markets - such as bias slicing.**

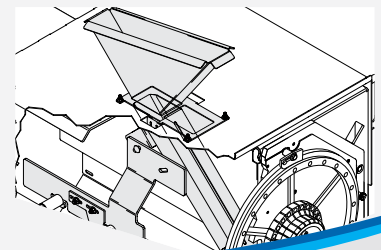

Newly developed parts transform the E TranSlicer® Cutter from standard slicing to either **35 or 45 degree bias flat or crinkle slicing.**

Available as the E TranSlicer Bias Cutter when ordering a new machine, or as a retrofit kit for E TranSlicer machines in the field.

Once retrofitted, switching over from flat to bias slicing is accomplished in as little as **10 minutes.**

Designed for hand-fed, batch processing (running at 30 Hz) equipped with a MicroSlice® or slicing wheel set-up.

Product is fed through a top chute that delivers product to the slicing wheel to produce bias slices.

Isometric view of the 45° bias slicing set-up.

Contact Urschel for a free-of-charge test-cut of your product to achieve your targeted cutting goals.
