

Meet

Urschel Laboratories, Inc.

The Global Leader in Food Cutting Technology®

Urschel continues to lead the world in the manufacturing and selling of industrial, high-capacity cutting equipment to the food processing and allied industries.

The company continues to expand around the globe to grow alongside this ever-changing, dynamic industry, while maintaining its headquarters and manufacturing facility in northwest Indiana, centrally located in the heart of the United States.

Design Philosophy

Urschel Engineers work together to create innovative, effective solutions to customer processing requirements. Every challenge is unique; every customer is different.

Precision in Manufacturing

Urschel machines and critical parts are manufactured under one roof to make sure strict quality standards are enforced.

Dedicated to Excellence

100% Employee Owned. Urschel is made up of employee owners who take pride in the overall success of the company. As an ESOP, employee owners share in the company growth and prosperity.

SLICE | DICE | STRIP | SHRED | GRANULATE | MILL | PUREE

Consumers purchase goods manufactured on Urschel cutting equipment on a daily basis including potato chips, peanut butter, nut milk, canned goods, frozen pizzas, ready to eat meals, fresh-cut bags of lettuce, and much more.

THE Building of Urschel

1910 Urschel was founded in Valparaiso, Indiana, U.S.A., by William E. Urschel with his invention of the Gooseberry Snipper, a machine that removed the stems and blossoms from the then popular berry, and was widely sold to Michigan canneries. The machine could do the work of 100 workers in a day.

1957 Remaining in Valparaiso, Urschel constructs a new manufacturing facility. With the company's ongoing success, more production space, manufacturing technology, and employees are necessary over time; more than 28 additions occurred at the 250,000 square-foot Calumet facility.

1972 Urschel International, Ltd. (UI) is created in England. Today, UI has direct offices throughout Europe.

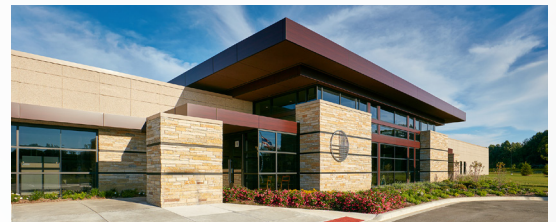

2004 Urschel Asia Pacific Pte Ltd. (UAP) is formed in Singapore. Today, UAP has direct offices throughout Asia Pacific.

2011 Urschel Latino America (ULA) is formed in Argentina to grow the Latin American market.

2012 Under the leadership of Bob Urschel, Chairman of the Board, and Rick Urschel, President/CEO, Urschel announces plans to construct a new campus in Chesterton, Indiana, on a 160-acre parcel. Urschel amps up part production to allow for a smooth transition.

2015 Urschel begins the months-long process moving into the new building, by August 2015 all departments have been successfully moved. The brand new state-of-the-art facility encompasses 385,000 square feet.

2016 Rick Urschel makes a major announcement that the Urschel family has decided to sell the previously, private-held family business and the company is converted to an ESOP (Employee Stock Ownership Plan). Urschel employees proudly embrace this change as the company becomes a 100% employee-owned company.

2018–2020 Urschel expansions increase test lab, office area, service and incorporate a fitness center.

2023–Present Currently, Urschel employs over 500 employees at the U.S. global headquarters. Urschel maintains direct sales offices in key locations throughout the U.S., Europe, Asia, and Latin America along with a network of sales representatives spanning the globe. With multiple expansions and new manufacturing technology, the facility stands at over 530,000 square feet.
