

Affinity[®] Dicer with Precutter

ALL-IN-ONE CUTTING SOLUTION

New Affinity Dicer with precutter offers an all-in-one solution for processing of preformed meat logs.

The newly designed machine reduces processing time and increases labor cost-savings by eliminating the need to cut meat logs before entering the dicer. This [¥]patented development is now available through Urschel's C.P. (Certified Print) Process.

Logs are fed into the open-designed conical hopper and are then reduced via an affixed knife working with the motion of the impeller. The reduced product then proceeds through the other cutting stations to produce strips or dices.

Contact Urschel to learn more about the Affinity Dicer with precutter.

Contact Urschel to schedule a free-of-charge test cut of your product.
