

Z-CUT

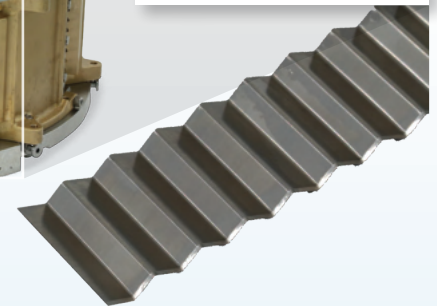

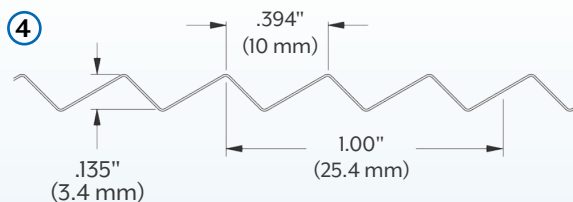

A UNIQUE TYPE OF CUT

Rely on Urschel to develop unparalleled cutting shapes like the distinct *Z-Cut slice, available for use on the Models CC, CC-D, CC-DL, and CCX-D. Developed for specialty slicing of potatoes and other vegetables, angled flanks create corrugations to create products that stand out from ordinary slices.

The Z-Cut slice can be produced in thicknesses from .030" to .115" (0.8 to 2.9 mm). Slice thickness is measured at the peak [1]. Overall slice thickness [2] and the thickness of the angled side or flank [3]. The shorter flank is the thinnest section of the slice. The corrugations [4] are .135" (3.4 mm) deep and measure .394" (10 mm) from peak to peak. There are 2.54 corrugations per inch (25.4 mm).

*The Z-Cut is only available in non-European countries.
